

Role: ASP.Net Web Developer

Location: Barrie, ON (or Remote)

Company Overview

Sylogist is the parent company to a network of innovative companies that provide mission-critical ERP and CRM solutions, including fund accounting, case management, grant management and payroll, to public service organizations. Sylogist's customers include all levels of government, non-profit organizations, nongovernmental organizations, and educational institutions, as well as public compliance driven and funded companies.

Our team is collaborative, enthusiastic and delivers on our promises. If you want to apply your skills to improve trusted technology that supports over 2000 customers around the world, then let's talk! To learn more, check out our careers page at www.sylogist.com

Position Overview

As a ASP.Net Web Developer at *pavliks.com, a division of Sylogist*, you will be working on building and implementing web portal solutions that integrate with Dynamics CRM/365 for a wide range of clients across North America and Europe. Projects will range from straight forward website/portal rollouts to more complicated integrated solutions, and range in size from 3 to 12-month engagements. You will be a part of a cohesive and strong team of experienced Software Developers and Dynamics CRM/365 consultants working remotely anywhere in Canada or locally from our Barrie office.

Responsibilities Include

- Build custom portal solution for clients using enterprise level CMS and 3rd party integrations tools such as:
 - Progress Sitefinity
 - The Portal Connector (Integrates Sitefinity to Dynamics 365)
 - Microsoft Dynamics 365
- Provide critical thinking and problem-solving services to clients and project teams.
- Develop custom components and integrations using C#.
- Develop custom web services and APIs leveraging the Microsoft stack of technologies.
- Develop client-facing interfaces using HTML, CSS/Sass and JavaScript.
- Integrate complex business logic with JavaScript (AJAX, jQuery, API Libraries).
- Participate and/or lead solution architecture discussions.
- Create and define tasks while providing an estimation of effort.

Desired Knowledge, Skills and Experience

- Bachelor's degree in computer science, Software Engineering, or college diploma in Software or Website Development
- 3+ years developing software within a team environment
- Strong ASP.NET development experience
- Strong C# development experience
- Strong JavaScript development experience (Vanilla / jQuery)
- Proficient with the MVC pattern of web development, specifically using Razor Views
- Proficient with HTML and CSS
- Knowledge of agile/waterfall project management methodologies
- Knowledge in Bootstrap
- Knowledge in SQL Server

- Knowledge of REST API's
- Knowledge of web application deployments in IIS and Azure an asset
- Knowledge with TypeScript an asset
- Knowledge with Progress KendoUI an asset
- Experience in Angular JS an asset
- Experience with Sitefinity CMS and The Portal Connector an asset
- Experience with Sass/Less an asset
- Experience with Microsoft Azure DevOps an asset
